

Ayush Kumar Tiwary

tiwaryayush1208@gmail.com | linkedin.com/in/tiwaryayush18 | Arrah, Bihar, India

Summary

Results-driven Computer Science undergraduate with hands-on experience in Data Science, Machine Learning, and AI. Proficient in Python and the modern ML/data stack (Pandas, NumPy, Scikit-learn, Matplotlib). Passionate about building scalable, data-driven solutions to realworld problems. Seeking to contribute to Google's mission of organizing the world's information through intelligent, impactful ML systems.

Technical Skills

Languages: Python, SQL

ML & Data Science: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

Concepts: Supervised & Unsupervised Learning, Model Evaluation, EDA, Data Preprocessing, Regression, Classification, Clustering

Tools & Platforms: Git, GitHub, Google Colab, VS Code, PowerBI, MS Excel

Soft Skills: Analytical Thinking, Problem Solving, Research Mindset

Education

Global Group of Institutes, Amritsar	2023-2027
<i>Bachelor of Technology(B.Tech) in Computer Science</i>	<i>Amritsar, Punjab</i>
Jai Prakash College, Arrah	2021-2023
<i>Senior Secondary (Class XII) – Science Stream</i>	<i>Arrah, Bihar</i>
Gyan Asthali Residential School, Shahpur	2021
<i>Secondary (Class X)</i>	<i>Shahpur, Ara, Bihar</i>

Experience

Solitaire Infosys Inc	June 2025 – July 2025
<i>Data Science Trainee</i>	<i>On-Site/ India</i>
- Performed end-to-end exploratory data analysis (EDA) using Python, Pandas & Matplotlib to derive business insights - Built and optimized ML models (classification & regression) using Scikit-learn - Pre-processed data: handled missing values, encoding & feature scaling - Presented insights via visualizations and reports for decision-making	

Projects

Fake News Detection System | Python, NLP, Scikit-learn, Pandas, TF-IDF

- Developed an NLP-based classification model using TF-IDF and ML algorithms to detect fake vs. real news.
- Performed text preprocessing and evaluated model using accuracy, precision, recall, and F1-score.

Stock Price Prediction System | Python, Pandas, NumPy, Scikit-learn

- Built an LSTM-based stock price prediction model using Python and deep learning techniques.
- Developed an interactive Streamlit dashboard for stock analysis and future forecasting.
- Used TensorFlow, Keras, and historical market data for time-series prediction.

Achievements & Certifications

Python (Basic) : Successfully completed the Python (Basic) Skill Certification from HackerRank, demonstrating proficiency in core Python programming concepts.
